FINAL RESPONSE

RECEIVED

DEC 30 2002

Dear Sir:

Technology Center 2600

In response to the **FINAL** Office Action dated November 20, 2002 please
reconsider the above-identified application as follows.

REMARKS

The Examiner rejected claim 1 under 35 U.S.C. 102(b) as being anticipated by Greenberger; rejected claim 2 under 35 U.S.C. 103(a) as being unpatentable further in view of Gibson; and objected to claims 3-15 as depending from a rejected base claim.

The Examiner states that Greenberger discloses a surround sound display representing a plurality of sound channels having a sound stage image (Fig. 14b), a correlation meter scale for each sound channel of the sound stage image that has a corresponding sound channel to form a stereo sound source (Fig. 14b where the directivity pattern is the result of two speaker arrays configured as in Fig. 15a), and markers related to the correlation meter scale that represent the correlation between the corresponding sound channels (Fig. 14b has marker).
